

The Many Colours of Energy

Be it mobility on roads or railroads, in air or sea or that of industrial or agricultural equipment, Pakistan State Oil is the most likely source of energy.

A service provider par excellence, PSO is the oil market leader in Pakistan, having an extensive network of 3,866 retail outlets and the storage and infrastructure facilities, providing the highest quality of fuels, lubricants and services to the customers across the country.

With a vision that recognizes broader corporate responsibility, PSO also remains vigorously committed to community improvement initiatives in the areas of environment protection, health care, education and support of public service institutions.

With a passion for customers and Total Quality Management, PSO is an innovative and dynamic energy company that gets to the future first.
